

Forming, Closing and Lidding Machines

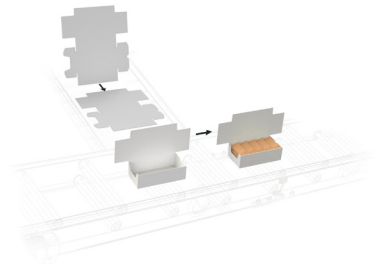

Experience unmatched flexibility with machines designed to prioritize quick and seamless format changeovers, able to switch between different specifications effortlessly, minimizing downtime and maximizing productivity.

Forming Machines

Forming machines specialize in crafting boxes and trays of various sizes and shapes.

Features

- Up to 180 boxes per minute
- Fixed or adjustable forming heads
- Double or triple forming heads
- Automatic format changeover options

Closing Machines

Operate with continuous movement, designed to efficiently close filled boxes with lids using hot melt glue or interlocking systems.

Features

- Adjustable speed up to 200 boxes per minute
- Quick and easy format change
- Intermittent or continuous motion
- Stainless Steel or painted steel construction welding

Forming, Closing and Lidding Machines

Lidding Machines

Machines dedicated to the positioning and gluing of cardboard lids onto trays or display boxes, formed from flat blanks.

Features

- Single or double lidding head
- Adjustable speed up to 40 boxes per minute
- Closing by hot-melt glue
- Average format change time: 5-10 minutes
- Stainless Steel or painted steel construction welding
