

Bagging Machines

Tubular FFS Machines

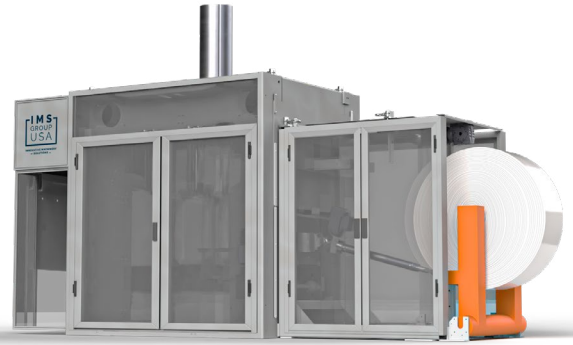

Tubular FFS machines offer an automated solution for producing 10 - 110 lb. pillow-shaped or gusseted bags of granules, powders, pellets, and more

Compacta Series FFS Machines

Designed to be reliable, cost effective, and completely customizable, this versatile machine accommodates various bag sizes and products/materials

Features:

- Max production speed: 2,600 bags/hour
- User-friendly HMI software for easy diagnostics
- Fully customizable feeding and dosing systems

Compacta Easy Entry-level model

Max production speed: 1,200 bags/hour

Compacta Mid-level model

Max production speed: 2,000 bags/hour

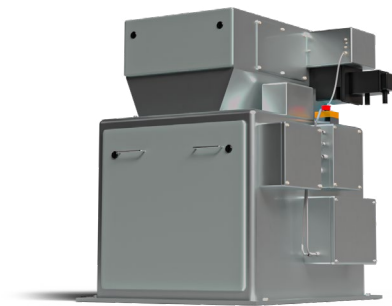

Compacta HS Advanced model

Max production speed: 2,500 bags/hour

Concept Scale

Industry leading system, virtually eliminating product giveaway

- **Accuracy:** error margin of +/- one ounce
- **Speed:** 2,400 bags per hour with one scale
- **Capability:** 30 gallons of product per second

Feeding system options

BLG

Gravity feed

Electronic scale with pneumatic catch gate, ideal for granular products

BLN

Gravity feed

Electronic auger scale, ideal for powdery products

BLCV

Auger feed

Electronic vibratory pan scale, ideal for flaked products

BLS

Auger feed

Electronic belt scale, ideal for fine and moist products

BLNN

Belt feed on scale

Electronic belt on belt scale, ideal for fine, moist, and low-flowing products

Bagging Machines

Versatile, High-Performance Packaging Film

Constructed from a cost-effective and highly protective plastic tubular film, this bag offers quality, affordability, and versatility

Features:

- Lower cost per bagg
- User-friendly for simple changeovers
- 100% recyclable polyethylene

In-line gusseting for longer film yield

Unique device produces gusseted bags from non-gusseted film

Film Roll Format	Bag Yield	Production Speed	Film Change Frequency
Pre-gusseted	3,000 bags	1,200 bags per hour	Every 2.5 hours
Non-gusseted	6,000 bags	1,200 bags per hour	Every 5 hours

Versatility for a wide range of products across all industries

Products:

- Fertilizer
- Gravel
- Salt
- Feed
- Seeds
- Resin
- Granules
- Wood pellets
- Powders

Industries:

- Agriculture
- Construction
- Cosmetics
- Food
- Industrial
- Lawn + garden
- Petrochemical
- Pet food
- Pharmaceutical

Small machine footprint
for confined spaces

Larger film reels for
reduced downtime

Reduced labor
requirement

ROI within four to
six months
