

Palletizers

Layer Palletizers

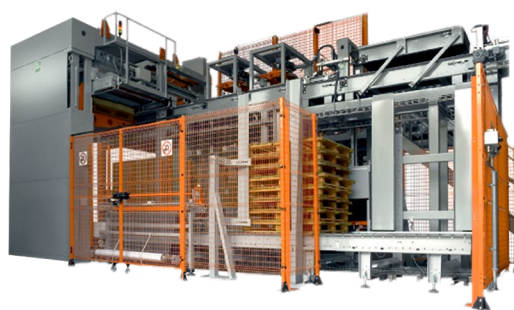

Designed for high-speed production in demanding work environments, stacking layer by layer to ensure uniform pallets

HF Series Palletizers

Offers reliable, user-friendly performance with mobile pallet, top bag loading and advanced diagnostics

Features:

- 800 - 2,800 bags per hour
- Easily adjust to different bag sizes and pallet layouts
- Stores up to 20 programmable patterns

LF Series Palletizers

Works with mobile pallet and bag loaded from the bottom for bags, bundles and boxes

Features:

- 800 - 1,200 bags per hour
- Compact design with high visibility for safe operation
- Stores multiple pallet configurations
- Built-in system for quick diagnostics and troubleshooting

Compact Palletizer

High-performance palletizer with closet-type design offering space-saving benefits while providing easy access for maintenance

Features:

- Max speed: 12 cycles/min
- Quick format changes (3-5 minutes)
- Easy maintenance with access on all sides

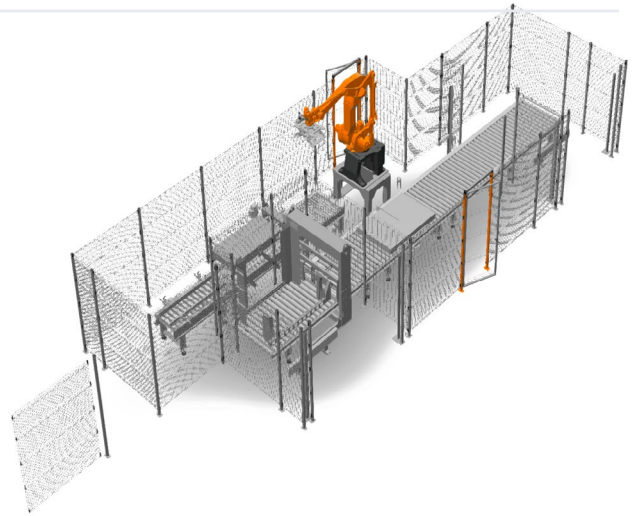

Palletizers

Robotic Palletizer

This advanced system can handle up to four product lines simultaneously using a single robotic arm, efficiently handling boxes, bundles, and bags

Features:

- Accurately recognizes and sorts product onto designated pallets
- Compact design with seamless integration into existing packaging lines
- Easily adjust picking heads for various package types, including pallet, slip sheet, and top sheet placement

Gantry-Style Palletizer

Modular pallet/product handling; suitable for half or full cases, plastic and custom cases/crates

Features:

- 4-axis brushless motors for precise movement
- User-friendly programming and operation
- Multiple pallet stations (up to 10)
